Professional Experience

Jun 2022 - Sep 2022

Invoca, Santa Barbara, CA

Software Engineering Intern

- Worked with a small team on full-stack software development using Ruby on Rails and React.js.
- Practiced agile software development skills through pair programming, standups, retrospectives, and backlog refinement.

`Ruby on Rails` `Full Stack Development` `Agile Software Development` `React.js` `RubyMine`

Aug 2021 - Sep 2021

Jones Lang LaSalle, San Francisco, CA

Data Loss Prevention (DLP) Intern

- Worked on a data loss prevention project to pinpoint sources of and minimize internal threats.
- Implemented robotic process automation (RPA) script to automate data extraction in Python.
- Utilized Microsoft Power BI, Tableau, and SQL to compile, cleanse, analyze, and present the data.

`Python` `Microsoft Power BI` `Tableau` `SQL` `Robotic Process Automation (RPA)`

Jun 2019 - Sep 2019

Bertram Labs, Foster City, CA

Data Science Intern

- Designed a database in MySQL/PostgreSQL. Utilized Microsoft Power BI to cleanse a user database.
- Designed and presented a prototype UI for the database in a pre-production environment.
- Researched natural language processing and data warehouses (Amazon AWS, Microsoft Azure, Google BigQuery).

`MySQL` `PostgreSQL` `Microsoft Power BI` `Prototyping` `Product Design`

Projects

Sep 2021 - Mar 2022

T.A.L.K., GitHub Repo

Senior CS Capstone Project, sponsored by Invoca

- Worked in a team of six to develop an Express web application deployed on Heroku to be used by salespeople.
- Designed a multi-cloud solution that displays critical call information in a single view.
- Utilized transcriptions generated by IBM Watson in near real-time that retain important call details.
- Leveraged NLP Cloud to generate concise call summaries so that salespeople can easily remember call contents.
- Determined keywords and the customer's sentiment using Google Cloud's NLP API to guide sales follow-ups.
- Integrated Invoca's APIs service to retrieve call transcripts and store the data in a MongoDB database.
- Maintained well-documented code bases with version control, and touched base with mentors weekly and with team members daily.

Express | JavaScript | Heroku | CSS | MongoDB | GitHub | Agile Development

Mar 2021 - Jun 2021

UCSB Courses Search, Application

Project for CMPSC 156: Advanced Applications Programming

- Worked with a team of ~20 people on this legacy project, a web application used to search for classes based on input criteria.
- Collaborated with a subteam of 5 people to focus on improving the search user interface.

React | Heroku | Spring Boot | Auth0 | GitHub | Agile Development

Feb 2021 - Mar 2021

Vision Test, Project Page

Project for ECE 153B: Sensor and Peripheral Interface Design

- Designed a “vision test” that simulates a tumbling E chart with symbols gradually decreasing in size.
- Displayed the E's on an 8x8 LED Matrix.
- Connected a Wii Nunchuk to allow a user to input the direction that the E is facing.
- Utilized a distance sensor to verify that the user is standing at an appropriate distance from the display.
- Utilized a terminal to display the user's vision score.
- Allowed for communication between both the 8x8 LED Matrix and the Wii Nunchuk with an STM32 microcontroller using I2C.
- Allowed for communication between the terminal and an STM32 microcontroller using SPI.

C | STM32 Microcontroller | I2C | SPI | Peripherals | Product Design

Jan 2021 - Feb 2021

COVID-19 Survival Naive Bayes Classifier, GitHub Repo

Project for CMPSC 165A: Artificial Intelligence

- Designed a Naive Bayes Classifier in Python that determines whether a patient will survive from COVID-19 given their preconditions.
- Preprocessed and cleansed training and validation data sets using NumPy and SciPy.
- Constructed a model to determine which data fields were of greater importance.
- Placed second on the class leader board for classification accuracy and runtime.

Artificial Intelligence | Machine Learning | Python | NumPy | SciPy | Data Processing | Modeling

Education

Expected Jun 2023

University of California, Santa Barbara, Santa Barbara, CA

Master of Science in Computer Science

- GPA: 4.0/4.0
- Programs: 5-year B.S./M.S. Program in Computer Science
- Coursework in: Scalable Internet Services, Augmented Reality, Computer Graphics, Operating Systems, Runtime Systems
- Extracurricular Activities: Four Eyes Lab (Pursuing research in human-computer interaction, computer vision, and augmented reality), UCSB Badminton Club

Sep 2018 - Mar 2022

Universtiy of California, Santa Barbara, Santa Barbara, CA

Bachelor of Science in Computer Engineering

- GPA: 3.7/4.0
- Programs: College of Engineering Honors Program, 5-year B.S./M.S Program in Computer Science
- Coursework in: Data Structures and Algorithms, Artificial Intelligence, Machine Learning, Computer Vision, Digital Image Processing, Operating Systems, Network Computing, Advanced Applications Programming, Object-Oriented Design, Sensor and Peripheral Interface Design
- Extracurricular Activities: Co-Founder and Vice President of UCSB Badminton Club (4 years)

Aug 2014 - Jun 2018

American High School, Fremont, CA

High School Diploma

- UC Weighted GPA: 4.50 (Uncapped), 4.14 (Capped)
- SAT I: 1560/1600
- SAT II Chemistry: 800/800
- SAT II Math L2: 800/800
- Relevant AP classes: AP Chemistry, AP Physics C, AP Biology, AP Calculus BC, AP Computer Science (in Java), and AP English Language and Composition
